

## Summary of Services

The name "Archer Experts" is a clear declaration of who we are and what we do. It is a bold proclamation that must be backed by stellar performance to stand up to the scrutiny of today's aggressive business climate. Archer Experts has a singular focus in maximizing the effectiveness of your GRC program through the design, configuration, and customization of RSA's Archer eGRC Platform, using the most experienced resources anywhere. **"Isn't it time you called an expert?"**

### Archer Use - Case Optimization Assessment

Need to know if you are capitalizing on the best of Archer, and if not, how to get there? This service provides customers with a review of current use cases and applications to identify areas of improvement with expected benefits. Both business stakeholders and technical support staff participate in a process that will show the way to maximizing the best of Archer and optimizing its manageability.

### Fully Managed Archer Solution Implementation

Our sweet spot of knowledge exists in the configuration and development of the RSA Archer eGRC Platform. Our team of PMP Certified Project Managers, Business Analysts and Certified Archer Administrators are fully scalable to achieve a single solution implementation or large scale enterprise integrations.

### Archer Strategic Roadmap Service

Regardless whether you are embarking on a brand new GRC journey or looking to mature your existing program, this service will map out the most successful plan to achieve your business objectives using RSA's Archer suite of software. Our Roadmap delivers the optimal deployment approach, levels of effort and timelines to deploy your company's specific Archer use-cases while ensuring long term scalability and adaptability.

### RSA Archer eGRC Platform Health Check and Tuning

Our Platform Health Check and Tuning service provides you with an assessment of the ability for your eGRC environment to meet the changing and increasing demands of your business. Whether it is for new product deployment or an existing platform that has matured over time, we help to identify risks, issues and areas of opportunity to help you maximize the benefits of your RSA Archer environments.

### On-Demand Experts

Don't feel you need fulltime assistance? Need periodic checkups or problem solving? Our service provides RSA Archer consulting expertise for ongoing prioritization and planning for project implementation and subject matter expertise to help mitigate the risks associated with implementing the RSA Archer eGRC Platform. It also ensures the implementation will follow RSA-recommended practices and support your organization's business requirements.

### Staff Augmentation Service

If you want to take the lead but need to supplement your team with the most seasoned US based professionals, lean on our group of experts which average 8 years of current, real-world Archer experience and 22 years of SDLC.

### RSA Software Sales and Licensing

Archer Experts is an RSA SecurWorld Partner offering RSA's innovative portfolio of software solutions to solve the most complex and sensitive security challenges.

## ARCHER EXPERTS TESTIMONIALS

### Archer Healthcare Customer

Archer Experts helped us out tremendously on our Archer implementation, customizing the out-of-the-box Archer application and creating new on-demand applications to help us automate certain business processes. They were willing to go the extra mile and help us even after our contract ended. I highly recommend Archer Experts for eGRC implementations using Archer.

### Archer Insurance Customer

The projects that Archer Experts are working on are successful and that is due to their unwavering commitment to ensuring our needs are met. Bringing them in for their expertise has turned out to be a great decision on our part, and any company that has Archer Experts on-board can be assured they will receive someone who knows what they are doing with Archer - not just how to build the application, but the business processes behind them, which is just as important when building an application.
